5 mm flat head hex screw	22	2.2	16

TOOLS REQUIRED

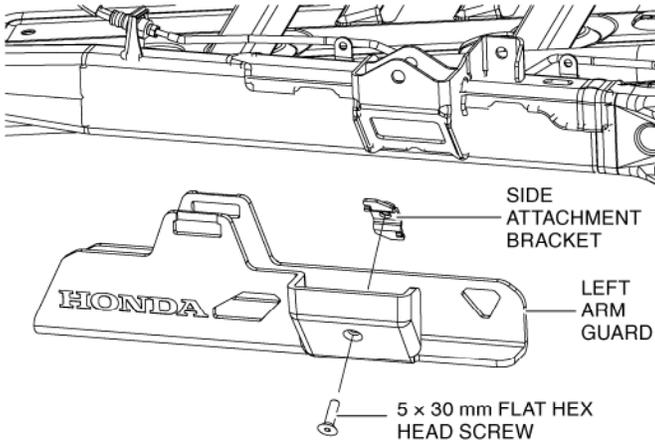

- Socket (10 mm)
- Ratchet
- Torque wrench
- Box-end wrench (10 mm)
- Hex wrench (5 mm)

INSTALLATION

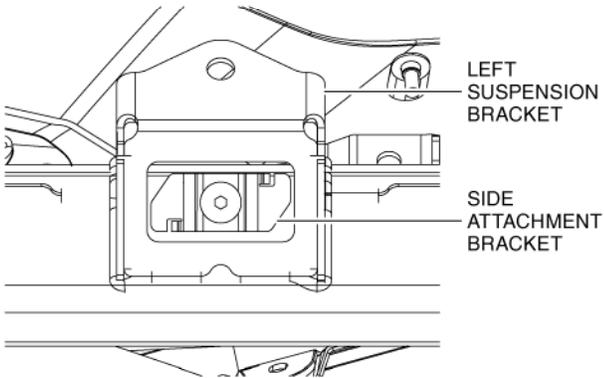

⚠ CAUTION

To prevent burns, allow the engine, exhaust system, radiator, etc., to cool before installing the accessory.

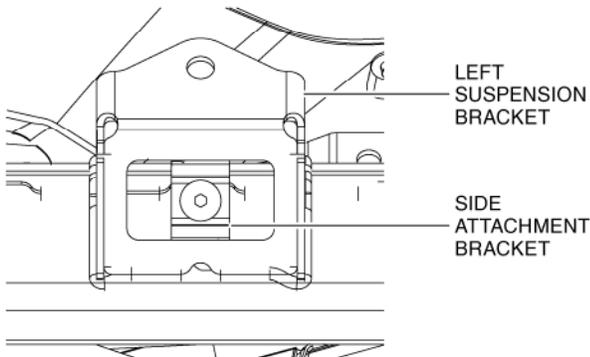

1. Start on the left side. Loosely install the side attachment bracket to the left arm guard using a 5 × 30 mm hex head screw.

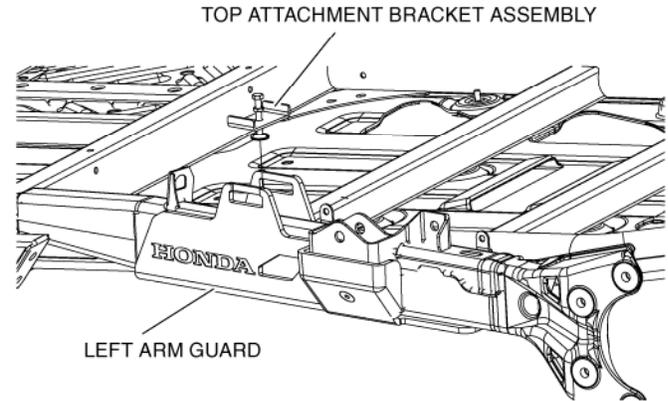

2. Position the side attachment bracket horizontally and insert the bracket through the rectangular hole in the rear arm of the vehicle.

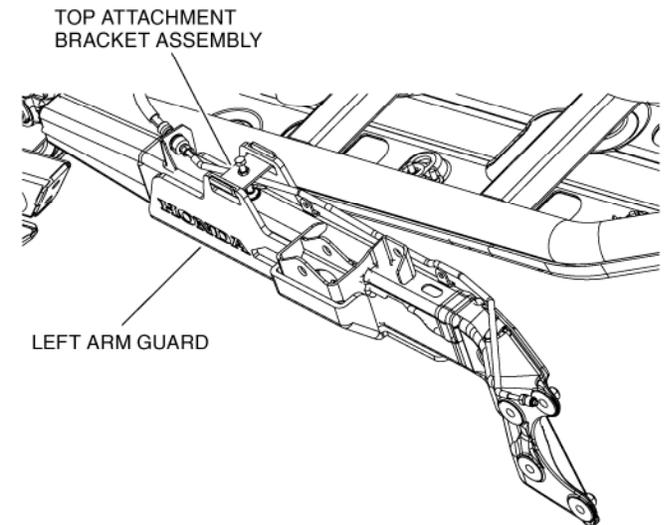

3. Rotate the side attachment bracket vertically and tighten the 5 × 30 mm hex head screw to the value specified in the TORQUE CHART.

4. Unscrew the bolt and nut of the top attachment bracket assembly.

5. Place the top attachment bracket assembly on the left arm guard as shown below. Be sure to center the bracket assembly on the suspension arm then tighten the 10 mm bolt of the bracket assembly to the value specified in the TORQUE CHART.

6. Repeat steps 1 through 5 on the right side.
